Section VII Chapter-39

#### **SECTION VII**

## PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF

#### **NOTES:**

- 1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are:
  - (a) Having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
  - (b) Presented together; and
  - (c) Identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
- 2. Except for the goods of heading 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

#### **CHAPTER 39**

#### PLASTICS AND ARTICLES THEREOF

#### **NOTES:**

1. Throughout this Schedule, the expression "plastics" means those materials of headings 3901 to 3914 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout this Schedule any reference to "plastics" are includes vulcanized fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.

- 2. This Chapter does not cover:
  - (a) Lubricating preparations of heading 2710 or 3403;
  - (b) Waxes of heading 2712 or 3404;
  - (c) Separate chemically defined organic compounds (Chapter 29);
  - (d) Heparin or its salts (heading 3001);

- (e) Solutions (other than collodions) consisting of any of the products specified in headings 3901 to 3913 in volatile organic solvents when the weight of the solvent exceeds 50% of the weight of the solution (heading 3208); stamping foils of heading 3212;
- (f) Organic surface-active agents or preparation of heading 3402;
- (g) Run gums of ester gums (heading 3806);
- (h) Prepared additives for mineral oils (including gasoline) or for other liquids used for the same purposes as mineral oils a (heading 3811);
- (ij) Prepared hydraulic fluids based on polyglycols, silicones or other polymers of Chapter 39 (heading 3819).
- (k) Diagnostic or laboratory reagents on a backing of plastics (heading 3822);
- (l) Synthetic rubber, as defined for the purpose of Chapter 40, or articles thereof;
- (m) Saddlery or harness (heading 4201) or trunks, suitcases, handbags or other containers of heading 4202;
- (n) Plaits, wickerwork or other articles of Chapter 46;
- (o) Wall coverings of heading 4814;
- (p) Goods of Section XI (textiles and textile articles);
- (q) Articles of Section XII (for example, footwear, headgear, umbrellas, sun umbrellas, walking-sticks, whips, riding-crops or parts thereof);
- (r) Imitation jewellery of heading 7117;
- (s) Articles of Section XVI (machines and mechanical or electrical appliances);
- (t) Parts of aircraft or vehicles of Section XVII;
- (u) Articles of Chapter 90 (for example, optical elements, spectacle frames, drawing instruments);
- (v) Articles of Chapter 91 (for example, clock or watch cases);
- (w) Articles of Chapter 92 (for example, musical instruments or parts thereof);
- (w) Articles of Chapter 94 (for example, furniture, lamps and lighting fittings, illuminated signs, prefabricated buildings);
- (x) Articles of Chapter 95 (for example, toys, games, sports requisites); or
- (y) Articles of Chapter 96 (for example, brushes, buttons, slide fasteners, combs, mouth-pieces or stems for smoking pipes, cigarette-holders or the like, parts of vacuum flasks or the like, pens, propelling pencils).
- 3. Headings 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
  - (a) Liquid synthetic polyolefins of which less than 60% by volume distils at 300°C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (headings 3901 and 3902);
  - (b) Resins, not highly polymerised, of the coumarone-indene type (heading 3911);
  - (c) Other synthetic polymers with an average of at least 5 monomer units;
  - (d) Silicones (heading 3910);
  - (e) Resols (heading 3909) and other prepolymers.

Section VII Chapter-39

4. The expressions "copolymers" covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.

For the purposes of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same heading shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

- 5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
- 6. In headings 3901 to 3914 the expression "primary forms" applies only to the following forms:
  - (a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
  - (b) Blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.
- 7. Heading 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 3901 to 3914).
- 8. For the purposes of heading 3917, the expression "tubes, pipes and hoses" means hollow products, whether semi-manufacturers or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
- 9. For the purpose of heading 3918, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45cm, suitable

Section VII Chapter-39

for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.

- 10. In headings 3920 and 3921, the expression "plates, sheets, film foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
- 11. Heading 3925 applies only to the following articles, not being products covered by any of the earlier heading of sub-Chapter II:
  - (a) Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 l;
  - (b) Structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
  - (c) Gutters and fittings thereof;
  - (d) Doors, windows and their frames and thresholds for doors;
  - (e) Balconies, balustrades, fencing, gates and similar barriers;
  - (f) Shutters, blinds (including Venetian blinds) and similar articles and parts and fittings thereof;
  - (g) Large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
  - (h) Ornamental architectural features, for example, flutings, cupolas, dovecotes; and
  - (ij) Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of builders, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

#### **SUB-HEADING NOTES:**

- 1. Within any one heading of this chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:
  - (a) Where there is a sub heading named "Other" in the same series:
    - (1) The designation in a subheading of a polymer by the prefix "poly" (for example, polyethylene and polyamide –6, 6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content;
    - (2) The copolymers named in subheadings 3901 30, 3903 20, 3903 30 and 3904 30 are to be classified in those subheadings,

Section VII Chapter-39

provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content;

- (3) Chemically modified polymer are to be classified in the subheading named "Other", provided that the chemically modified polymers are not mere specifically covered by another sub-heading;
- (4) Polymers not meeting (1), (2) or (3) above, are to be classified in the sub-heading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of sub-headings under consideration are to be compared;
- (b) Where there is no sub-heading named "Other" in the same series:
  - (1) Polymers are to be classified in the sub-heading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same sub-heading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared;
  - (2) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.

Polymer blends are to be classified in the same sub-heading as polymers of the same monomer units in the same proportions.

2. For the purposes of sub-heading 3920 43, the term "plasticisers" includes secondary plasticisers.

#### **Policy Conditions of this Chapter:**

1. Import of PVC Floorings Scrap (scrap denotes industrial trimmings and rejects only) shall be permitted for imports with the following specifications:

#### A. Specifications:

- (i) The PVC flooring scrap shall consist of thoroughly blended composition of thermoplastic binder, fillers and pigments. The thermoplastic binder shall consist substantially of one or both of the following namely (a) Vinyl Chloride polymer and (b) Vinyl Chloride co-polymer.
- (ii) The density shall be > 1.3.
- (iii) Ash content shall be < 21 to 30%.
- (iv) The product manufactured form scrap shall conform to IS 14535: 1998 Recycled plastics manufacturer of products design, and Recycling shall be in accordance with IS 14534: 1998- Guidelines for recycling of plastic.
- (v) Final Waste PVC scrap (i.e. unconverted to floor coverings etc.) shall not exceed 5% of the quantity imported and shall be disposed of in landfills.

#### B. Conditions for import:

- (i) Only industrial, trimmings and rejects of PVC flooring scrap shall be allowed to be imported.
- (ii) Post consumer PVC flooring scrap and waste shall not be allowed to be imported.
- (iii) Imports shall only be allowed to actual users. In case the actual users hire export/import houses they could do so on receipt of specific request from actual users for specific quantities based on the installed capacity of the plant only.
- (iv) The concerned Pollution Control Boards/Pollution Control Committees shall monitor the use of PVC scrap imported by the units.

Section VII Chapter-39

- (v) The units/PVC scrap users shall file a return of imports made during a calendar year to the concerned PCB/PCCs; and
- (vi) The product so manufactured should meet the BIS specifications IS 3462, 1986 for unbacked flexible PVC floorings.
- 2. Import of plastic wastes/scrap (except PET Bottle Waste/Scrap) shall be permitted only against an authorization (licence) granted by DGFT. The specifications and guidelines of import of Plastic Wastes/Scrap are as follows:

#### A. Specifications:

- (i) Plastic scrap/waste shall constitute those fractions of plastics generated by various plastic processing operations or those fractions generated in the production process of plastics in a plant, which have not been put to any use whatsover and as such can be termed as virgin or new material which can be recycled into viable commercial products using standard plastic processing techniques but without involving any process of cleaning, whereby effluents are generated.
- (ii) Such virgin/new Plastic scrap/waste shall be permitted for import in compressed form, films in cut condition, cut tape soft waste and flakes, powders, pieces of irregular shape (not exceeding the size of 3" x 3").
- (iii) Any other category of plastic scrap/wastes which are not covered by the description/definition as given in sub-paras (i) and (ii) above shall not ordinarily be permitted.

#### B. Conditions for import:

- (i) Applications for import licences would be granted by DGFT in consultation with Department of Chemicals & Petrochemicals and Ministry of Environment & Forests.
- (ii) The plastic scrap/wastes conforming to the prescribed specifications would be permitted only to the actual users who have the required facility for recycling such crap/waste duly and who registered with are the competent State/Central authority and also possess clear pollution clearance certificate from the concerned State Pollution Board where the unit is located, as well as a capacity assessment certificate.
- (iii) Each consignment of plastic scrap/wastes imported shall be accompanied with a certificate from the factory in which it was generated to the effect that it conforms to the prescribed specifications.

Section VII Chapter-39

- (iv) The importer of the plastic scrap/waste shall also be required to furnish a declaration to the Customs authorities at the time of clearance of goods, certifying that the plastic scrap/wastes imported by him and for which clearance is being sought, strictly conforms to the prescribed specifications and that it is free from any kind of toxic/non-toxic contamination and has not been put to any previous use, whatsoever.
- (v) Before the clearance of the plastic waste/scrap, all imported consignments of such plastic crap/waste shall be subjected to scrutiny and testing of samples. Customs authorities shall for this purpose draw a sample and send the same to the nearest laboratory/Office of the Central Institute of Plastic Engineering & Technology (CIPET) with a view to having the same analysed and verified that such imported consignments are in conformity with the prescribed specifications. Plastic Testing Facilities of CIPET are listed at Para 3 above.
- (vi) In case of misdeclaration regarding the material being free from any toxic/hazardous substances by the importer, action as per laws of Ministry of Environment and Forests applicable under the Environment (Protection) Act, for committing offences leading to damage of environment and increase in pollution in the country, as modified and in force from time to time, would be taken by the competent authority. For any other misdeclaration, laws formulated by the Directorate General of Foreign Trade, in force from time to time, would also apply and action as per Foreign Trade (Development and Regulation) Act, 1992 shall be initiated by the competent authority.
- (vii) Import authorizations issued by DGFT shall be subject to Actual User condition and any other such condition as may be as imposed in consultation with the Department of Chemicals & Petrochemicals and Ministry of Environment & Forests.
- C. Import of Plastic Wastes / Scrap under Advance Authorisation Scheme:

All the above mentioned specifications and conditions of import except B(i) above shall be applicable to the imports made under the Duty Exemption Scheme against Advance Authorisation.

Section VII Chapter-39

Applications for Advance Authorisations for the import of plastic wastes and scrap shall in this case be considered by the Norms Committee of DGFT in consultation with Department of Chemicals & Petrochemicals and Ministry of Environment & Forests.

D. Import of plastic wastes and scrap by l00% EOUs and units in the SEZ

While imports of plastic wastes and scrap by 100% EOUs and units in the SEZ shall continue to be governed by the provisions of Chapter 6 of the Foreign Trade Policy/SEZ Act & Rules, the parameters for import of plastic wastes/scrap as specified hereinabove shall however be kept in view by the Board of Approval concerned while approving such units under the Scheme.

E. The import PET bottle waste/scrap shall be freely importable as hitherto.
